Scope

The annual *Summer Safety and Reliability Seminars* are organised to advance the methods for the safety and reliability analysis of complex systems and processes and to disseminate the newest achievements in the field. The subjects of the Seminars, different from year to year, are chosen by the Seminars Board in an effort to dynamically represent the methodological advancements developed to meet the newly arising challenges in the field of safety and reliability. This year the emphasis is addressed to the following subjects: Reliability and Safety of Complex Systems and Processes Modelling, Critical Infrastructure Safety and Operation Cost Optimization, Critical Infrastructure Accident Consequences Mitigation, Reliability and Safety of Transportation Systems and Processes, Reliability and Safety of Energy Distribution Networks.

Language

The Seminars language is English.

Contributions

Contributions are in the form of 1-hour lectures on advanced methods presented at Plenary Sessions and 20-minutes papers presented at Seminar Sessions, with corresponding full text of up to 20 pages.

Training and educational courses and workshops will be offered each year on selected safety and reliability topics.

The authors are requested to submit their lectures and papers electronically to the Secretariat using the following e-mail address: ssars@umg.edu.pl

Only those contributions prepared according to the Paper Contribution Template available on <http://jpsra.am.gdynia.pl> will be considered.

The papers peer-reviewed and accepted by the Seminar Board will be included in Monograph entitled "Safety and Reliability of Systems and Processes Summer Safety and Reliability Seminar 2020", with an ISBN-number (80 points per monograph and 20 points per chapter according to regulations of the Polish Ministry of Science and Higher Education).
